SUMMARY

Business Analyst with hands-on experience across data analytics, ETL pipelines, cloud platforms, and BI reporting, backed by an AWS Solutions Architect certification and a builder's mindset for scalable data systems.

TECHNICAL SKILLS

Programming & Querying: Python, SQL (PostgreSQL)

Data Engineering: ETL Pipelines, Data Modelling, Data Cleaning, Stream Processing

Cloud & Platforms: AWS (EC2, Lambda, API Gateway, CloudWatch, DynamoDB, S3, IAM), Azure Blob Storage

Libraries & Tools: Power BI, Pandas, NumPy, Snowflake, Git, Excel

EXPERIENCE

Business Analyst

Mar 2026 - Present

NoBroker Technologies Solutions Pvt Ltd

Bengaluru, KA

- Extracted and analyzed sales data across 200K+ customer records using **PostgreSQL**, delivering weekly performance overviews to the sales team.
- Coordinated 3–4 weekly business review meetings, presenting insights to align sales on targets and deal status.
- Monitored 100+ leads per cycle, identifying 15–20 high-quality prospects through data engagement analysis.

Analyst

July 2025 – Feb 2026

Apna Time Tech Pvt Ltd

Bengaluru, KA

- Designed and maintained **ELT pipelines** using **SQL** based transformation layers, processing 15,000+ operational records for downstream analytics consumption.
- Developed data quality frameworks to validate data across 3 source tables, cutting pipeline failures by 30%.
- Optimized 10+ **SQL** queries powering **Metabase dashboards**, improving query performance by 20%.
- Defined **data models** and reporting metrics with stakeholders for reliable downstream consumption.

Business Applications Support Trainee

July 2024 – June 2025

Endress+Hauser Infoserve

Aurangabad, MH

- Cleaned and transformed AFDC material datasets containing over 2,000 records using **SQL** and **Excel** to support inventory and procurement workflows.
- Prepared structured datasets for 3 to 5 **Power BI** dashboards enabling KPI tracking for stock movement and vendor performance.
- Partnered with stakeholders to define data validation rules to ensure accuracy for inventory monitoring workflows.

PROJECTS

Aadhaar Enrolment & Update Analytics System ([Link](#))

- Analyzed 18 lakh+ anonymised Aadhaar records (2025) using **excel** across 28 states and 3 data domains including demographic, biometric, and enrolment.
- Built a **Python ETL pipeline** on **S3** (raw & processed layers) for data cleaning & transformation, with secure access via **IAM roles** and **STS AssumeRole**.
- Loaded curated data into **PostgreSQL** and designed a **Power BI dashboard**, reducing manual reporting effort by 40% for governance decision-making.

India JobStream ([Link](#))

- Pulled over 5,000 job postings per day from Adzuna API using **Python**, stored raw JSON in **Azure Blob Storage**, and auto-ingested into Snowflake via **Snowpipe**.
- Used **Snowflake Streams** and **Tasks** with a 1-minute schedule to incrementally transform and load data, reducing data latency by 90% compared to batch processing.
- Delivered **Power BI** dashboards showing hiring trends, top cities, roles, salary, and experience demand.

EDUCATION

Bachelor of Technology in Computer Science

Shivaji University

Kolhapur, MH

Sept. 2020 – July 2024

CERTIFICATIONS

AWS Certified Solutions Architect-Associate ([Link](#))

March 2026
